COMMENT

A positive influenza A associated with negative H1 or H3 subtyping results do not preclude influenza A virus H1/H3 infections. Low level positive influenza A may result in non-sub typeable seasonal influenza. Samples can be submitted for further testing at state public health laboratories if available.

The results of this test should not be used as the sole basis for diagnosis, treatment or other patient management decisions. For inquiries please contact 1-866-MYQUEST (1-866-697-8378).

This assay cannot reliably distinguish between Rhinovirus and Enterovirus due to genetic similarities between the viruses.
